

CHEMICAL AND BIOLOGICAL CONTROLS DIVISION PERSONNEL

Name: Kimberly Orr, DVM, Ph.D.

Title: Senior Biologist

Responsibilities & Duties

Dr. Orr's professional background is in veterinary epidemiology. She is a licensed veterinarian with a Ph.D. in pathobiology and is board certified in Veterinary Preventive Medicine and Epidemiology. She is the Designated Federal Official for the Materials Technical Advisory Committee that advises the government on emerging issues and regulatory actions. Dr. Orr is also a technical, regulatory and policy expert in the areas of biological commodities and biological weapons non-proliferation. She processes and countersigns export license applications, commodity classifications, exodus cases, and commodity jurisdiction requests. She identifies and participates in outreach opportunities, drafts and reviews white papers, participates in AG and interagency discussions, and helps draft regulations.

Phone: 202-482-4201

Name: Scott Hubinger, Ph.D.

Title: Senior Chemist and General Engineer

Responsibilities & Duties

Dr. Hubinger's professional background is in chemistry and general engineering with work experience conducting research in inorganic chemistry and chemical physics, performing chemical weapons defensive testing, and in ensuring chemical and biological weapons nonproliferation and treaty compliance. He is a technical, regulatory, and policy expert in the areas of chemicals and chemical equipment, and chemical weapons non-proliferation. Dr. Hubinger drafts and reviews proposals for multilateral export controls and reviews export license applications, industry classification requests, export enforcement licensing determination requests, and USG commodity jurisdiction requests for chemical and biological commodities.

Phone: 202-482-5223

Name: Gene Lewis, Ph.D., P.E.

Title: Engineer

Responsibilities & Duties

Dr. Lewis' professional background is in the design of strip steel fabrication facilities, design and testing of liquid rockets, design of missile launching facilities, and teaching graduate engineers on testing for certified professional engineers. He manages the license-application agency-review process for CBC-related commodities, technology, and equipment with the SHIELD group. He also processes commodity classification requests, license determinations, exodus cases, and commodity jurisdiction requests. He also provides advisory opinions to applicants on EAR/ECCN questions/issues and represents CBC in forums on licensing issues to OEE and other groups.

Phone: 202-482-6109

Name: Betty Lee, Ph.D

Title: Microbiologist

Responsibilities & Duties

Dr. Lee's professional background is in cancer biology, immunology, biotechnology, patent examination and technology transfer. She worked in the biotechnology industry for several years as a technology transfer specialist. She processes export licenses, commodity classification requests, license determinations, exodus cases, and commodity jurisdiction requests. She also reviews CFIUS cases as the technical liaison for CBC as well as VISA cases. Dr. Lee gives seminar presentations with the Exporter Outreach Services on a regular basis. She also provides advisory opinions to applicants on EAR/ECCN questions/issues, advises CBC management on emerging policy issues, reviews and provides comments on new regulations and draft AG papers, and represents CBC in forums on licensing issues to OEE and other groups.

Phone: 202-482-5817

Name: Timir Misra

Title: Engineer

Responsibilities & Duties

Mr. Misra's professional background is in chemical and materials engineering. Manages the licensing and classification workload for the division and ensures the license-application and agency-review process operates efficiently for CBC-related commodities, technology, and equipment. Mr. Misra also processes commodity classification requests, license determinations, exodus cases, and commodity jurisdiction requests. He also provides advisory opinions to applicants on EAR/ECCN questions/issues, advises CBC management on emerging policy issues, reviews and provides comments on new regulations and draft AG papers, and represents CBC in forums on licensing issues to OEE and other groups.

Email: timir.misra@bis.doc.gov

Phone: 202-482-2260

Name: Frank Trevino, Jr.

Title: Engineer

Responsibilities & Duties

Mr. Trevino's professional background is in Solid Rocket Boosters Systems and chemical engineering. He processes export licenses, commodity classification requests, license determinations, exodus cases, and commodity jurisdiction requests. He also advises CBC management on emerging policy issues, reviews and provides comments on new regulations and draft AG papers, and represents CBC in forums on licensing issues to OEE and other groups.

Email: frank.trevino@bis.doc.gov

Phone: 202-482-2711

Name: Wesley Johnson, Ph.D

Title: Microbiologist

Responsibilities & Duties

Dr. Johnson's professional background is in microbial ecology and comparative bacterial genomics. He processes export licenses, commodity classification requests, license determinations, exodus cases, and commodity jurisdiction requests. He also advises CBC management on emerging policy issues, reviews and provides comments on new regulations and draft AG papers, and represents CBC in forums on licensing issues to OEE and other groups.
